Table1 notes:

^aCell percentages represent use among adults in that age, race/ethnic, or age-race/ethnic subgroup. The denominator for cell percentages in the "All" column includes all non-Hispanic white, black, Latino, Filipino, and Chinese members in that age group. See Multimedia Appendix 1 for cell denominators. Due to the very large denominators for all cells, comparisons with *P* values \geq .015 are not reported. See Multimedia Appendix 3 for detailed *P* values.

^bSignificantly differs (*P*<.001) from non-Hispanic whites within same age group after controlling for sex.

^cSignificantly differs (*P*<.001) from 65-69 age group within All or within same race/ethnic group after controlling for sex.

^dSignificantly differs (*P*=.003) from 65-69 age group within this race/ethnic group after controlling for sex.

 \int_{1}^{e} Significnatly differs (*P*=.001) from non-Hispanic whites in same age group after controlling for sex.

^tSignificantly differs (*P*=.009) from non-Hispanic whites in same age group after controlling for sex.

⁹Significantly differs (*P*=.008) from 65-69 age group within same race/ethnic group after controlling for sex.

^hSignificantly differs (*P*=.002) from 65-69 age group within same race/ethnic group after controlling for sex.

Table 2. Differences by age cohort and race/ethnic group in use of the health plan's patient portal in 2013 among patients ages 65-79 who have diabetes, hypertension, and/or coronary artery disease^a

^aStudy population for this table is members who were in a health plan diabetes, hypertension, or coronary artery disease registry in 2013. Cell percentages represent use among adults in that age, race/ethnic, or age-race/ethnic subgroup. The denominator for cell percentages in the "All" column includes all non-Hispanic white, black, Latino, Filipino, and Chinese members in that age group. See Multimedia Appendix 1 for cell denominators. Due to the large denominators for all cells, comparisons with *P* values \geq .055 are not reported. See Multimedia Appendix 3 for detailed *P* values. ^bSignificantly differs (*P*<.001) from non-Hispanic white within same age group after controlling for sex.

^cSignificantly differs (*P*<.001) from 65-69 age group within All or within same race/ethnic group after controlling for sex.

Significantly differs (P=.007) from 65-69 age group within All or within same race/ethnic group after controlling for sex.

Significantly differs (P=.007) from 65-69 age group within same race/ethnic group after controlling for sex. ^eSignificantly differs (P=.005) from 65-69 age group within same race/ethnic group after controlling for sex.

Significantly differs (P=.000) from non-Hispanic white within same age group after controlling for sex.

Significantly differs (P=0.02) from 65.60 and group within some recollething group after controlling for sex.

⁹Significantly differs (P=.023) from 65-69 age group within same race/ethnic group after controlling for sex.

^hSignificantly differs (P=.013) from non-Hispanic white within same age group after controlling for sex.

Significantly differs (P=.004) from non-Hispanic white within same age group after controlling for sex.

Significantly differs (P<.008) from non-Hispanic white within same age group after controlling for sex.

^aCell percentages are based on weighted data for everyone in that age or race/ethnic group. Ns at top of columns are the unweighted number of respondents in that group. P values \geq .055 are not reported. See Multimedia Appendix 3 for detailed P values.

^bSignificantly differs (*P*<.001) from 65-69 age group after controlling for race/ethnicity and sex.

^cSignificantly differs (*P*<.001) from non-Hispanic white after controlling for age group and sex.

^dGED = General Educational Development (credential indicating that individual has met high school level academic skills) ^eSignificantly differs (*P*=.020) from 65-69 age group after controlling for race/ethnicity and sex.

^fBased on estimates from a 2011 health survey of the same health plan membership. A household income ≤\$35,000 qualifies an individual for income-subsidized, low income housing.

^gSignificantly differs (*P*=.008) from non-Hispanic white after controlling for age group and sex.

^hSignificantly differs (*P*=.004) from non-Hispanic white after controlling for age group and sex.

 $\ln \ge 1$ of the health plan's chronic disease registries for these conditions

Significantly differs (P=.012) from 65-69 age group after controlling for race/ethnicity and sex.

^kSignificantly differs (*P*<.01) from 65-69 age group after controlling for race/ethnicity and sex.

Significantly differs (*P*<.05) from non-Hispanic white after controlling for age group and sex.

^aMost preferred method restricted to people who indicated only one method or a most preferred method if >1 method was indicated. Cell percentages are based on weighted data for everyone in the age or race/ethnic group. Ns at top of columns are the unweighted number of respondents in that group. *P* values \geq .055 are not reported. See Multimedia Appendix 3 for detailed *P* values.

^bSignificantly differs (P < 001) from 65-69 age group after controlling for race/ethnicity and sex. ^cSignificantly differs (P < .001) from non-Hispanic white after controlling for age group and sex. ^dSignificantly differs (P = .021) from non-Hispanic white after controlling for age group and sex . ^eSignificantly differs (P = .005) from 65-69 age group after controlling for race/ethnicity and sex. Significantly differs (P = .004) from non-Hispanic white after controlling for age group and sex. ⁹Significantly differs (P = .002) from non-Hispanic white after controlling for age group and sex. ^hSignificantly differs (P = .010) from non-Hispanic white after controlling for age group and sex. Significantly differs (P = .045) from 65-69 age group after controlling for race/ethnicity and sex. ¹Significantly differs (P = .024) from non-Hispanic white after controlling for age group and sex. ^kSignificantly differs (P = .004) from 65-69 age group after controlling for race/ethnicity and sex. Significantly differs (P = .013) from 65-69 age group after controlling for race/ethnicity and sex. ^mSignificantly differs (P = .001) from non-Hispanic white after controlling for age group and sex. ⁿSignificantly differs (P = .022) from non-Hispanic white after controlling for age group and sex. ^oSignificantly differs (P = .028) from 65-69 age group after controlling for race/ethnicity and sex. ^PSignificantly differs (*P* = .007) from non-Hispanic white after controlling for age group and sex. ^qSignificantly differs (P = .023) from 65-69 age group after controlling for race/ethnicity and sex. Significantly differs (P = 0.37) from 65-69 age group after controlling for race/ethnicity and sex. ^sRestricted to seniors who take medications for a chronic condition and do not rely totally on others to order their prescription refills. ^tSignificantly differs (P = .008) from non-Hispanic white after controlling for age group and sex. ^uSignificantly differs (P = .011) from non-Hispanic white after controlling for age group and sex. ^vSignificantly differs (P = .005) from non-Hispanic white after controlling for age group and sex. ^wSignificantly differs (P = .014) from 65-69 age group after controlling for race/ethnicity and sex. ^xSignificantly differs (P = .018) from non-Hispanic white after controlling for age group and sex. ^ySignificantly differs (P = .020) from non-Hispanic white after controlling for age group and sex. ^zSignificantly differs (P = .012) from non-Hispanic white after controlling for age group and sex. ^{aa}Significantly differs (P = .033) from non-Hispanic white after controlling for age group and sex. ^{bb}Significantly differs (P = .027) from 65-69 age group after controlling for race/ethnicity and sex. ^{cc}Significantly differs (P = .048) from non-Hispanic white after controlling for age group and sex. ^{dd}Significantly differs (P = .003) from non-Hispanic white after controlling for age group and sex. ^{ee}Significantly differs (P = .030) from 65-69 age group after controlling for race/ethnicity and sex. ^{ff}Significantly differs (P = .041) from non-Hispanic white after controlling for age group and sex. ^{gg}Significantly differs (P = .029) from non-Hispanic white after controlling for age group and sex. ^{hh}"By phone using the phone keypad to enter answers to questions read by a nice taped voice." ⁱⁱSignificantly differs (P = .002) from 65-69 age group after controlling for race/ethnicity and sex. ^{ij}Significantly differs (P = .033) from non-Hispanic white after controlling for age group and sex.

^aMost preferred method restricted to people who indicated only one method or a most preferred method if >1 method was indicated. Cell percentages are based on weighted data for everyone in the age or race/ethnic group. Ns at top of columns are the unweighted number of respondents in that group. *P* values \geq .055 are not reported. See Multimedia Appendix 3 for detailed *P* values.

^bSignificantly differs (*P* <.001) from 65-69 age group after controlling for race/ethnicity and sex.

^cSignificantly differs (P < .001) from WhiteNH after controlling for age group and sex.

^dSignificantly differs (P = .039) from 65-69 age group after controlling for race/ethnicity and sex. ^eSignificantly differs (P = .007) from non-Hispanic white after controlling for age group and sex. ^fSignificantly differs (P = .009) from 65-69 age group after controlling for race/ethnicity and sex. ^gSignificantly differs (P = .009) from non-Hispanic white after controlling for age group and sex. ^hSignificantly differs (P = .015) from non-Hispanic white after controlling for age group and sex.

Significantly differs (P = .001) from non-Hispanic white after controlling for age group and sex.

¹Differs (P = .050) from non-Hispanic white after controlling for age group and sex.

^kSignificantly differs (P = .002) from 65-69 age group after controlling for race/ethnicity and sex. ^ISignificantly differs (P = .002) from non-Hispanic white after controlling for age group and sex.

^mRestricted to people who completed the longer form of the questionnaire

ⁿSignificantly differs (P = .035) from non-Hispanic white after controlling for age group and sex.

Table 7 notes continued:

^oSignificantly differs (*P* =.024) from non-Hispanic white after controlling for age group and sex. ^PSignificantly differs (*P* =.026) from non-Hispanic white after controlling for age group and sex. ^qSignificantly differs (*P* = 003) from non-Hispanic white after controlling for age group and sex. ^rSignificantly differs (*P* =.013) from non-Hispanic white after controlling for age group and sex. ^sSignificantly differs (*P* =.022) from 65-69 age group after controlling for race/ethnicity and sex. ^tSignificantly differs (*P* =.040) from non-Hispanic white after controlling for age group and sex. ^tSignificantly differs (*P* =.040) from non-Hispanic white after controlling for race/ethnicity and sex. ^vSignificantly differs (*P* =.005) from non-Hispanic white after controlling for age group and sex. ^vSignificantly differs (*P* =.023) from non-Hispanic white after controlling for age group and sex. ^vSignificantly differs (*P* =.027) from 65-69 age group after controlling for age group and sex. ^vSignificantly differs (*P* =.027) from 65-69 age group after controlling for age group and sex. ^vSignificantly differs (*P* =.027) from 65-69 age group after controlling for age group and sex. ^vSignificantly differs (*P* =.027) from 65-69 age group after controlling for age group and sex. ^vSignificantly differs (*P* =.027) from 65-69 age group after controlling for age group and sex.

^aAbility to use the Internet was assigned based on a "Yes" answer to the question "Can you use the Internet to get information from websites or to communicate with others?" Most senior Internet users were able go online on their own, but some indicated needing help or someone to go online for them. Ability to use email was assigned using the same type of question and responses. Cell percentages are based on weighted data for everyone in that age or race/ethnic group. Because percentages are based on responses to different questions, unweighted cell Ns vary. Most cell Ns can be ascertained from earlier tables, and they are also provided in Multimedia Appendix 4.

P values ≥.055 are not reported. See Multimedia Appendix 3 for detailed P values.

^b Significantly differs (P < .001) from 65-69 age group after controlling for race/ethnicity and sex.

^c Significantly differs (P < .001) from WhiteNH after controlling for age group and sex.

^d Significantly differs (P = .021) from WhiteNH after controlling for age group and sex.

^e Significantly differs (P = .004) from 65-69 age group after controlling for race/ethnicity and sex.

^f Restricted to seniors who take medications for a chronic condition and do not rely totally on others to order their prescription refills.

⁹ Significantly differs (P = .030) from WhiteNH after controlling for age group and sex.

^h Significantly differs (P = .036) from WhiteNH after controlling for age group and sex.

Significantly differs (P = .045) from WhiteNH after controlling for age group and sex.

¹Significantly differs (P = .002) from WhiteNH after controlling for age group and sex.

^k Significantly differs (P = .002) from WhiteNH after controlling for age group and sex.

Significantly differs (P = .019) from 65-69 age group after controlling for race/ethnicity and sex.

^m Significantly differs (P = .001) from WhiteNH after controlling for age group and sex.

ⁿ Significantly differs (P = .048) from WhiteNH after controlling for age group and sex.

^aSeniors were asked whether the health plan's shift toward using its website and patient portal has made it easier or harder for them to obtain information and communicate with their doctors. Analyses were restricted to people who expressed an opinion (including that there had been no change) about their ability to perform this task. Cell percentages are based on weighted data for everyone in the age or race/ethnic group. Because people did not indicate opinions about all tasks, unweighted cell Ns vary; they are provided in Multimedia Appendix 4. *P* values \geq .055 are not reported. See Multimedia Appendix 3 for detailed *P* values.

^b Significantly differs (P = .001) from 65–74 age group after controlling for race/ethnicity and sex.

^c Significantly differs (P = .024) from 65–74 age group after controlling for race/ethnicity and sex .

^d Significantly differs (P = .001) from WhiteNH after controlling for age group and sex.

^e Significantly differs (P = .050) from WhiteNH after controlling for age group and sex.

^f Significantly differs (P < .001) from 65-74 age group after controlling for race/ethnicity and sex.

⁹ Significantly differs (P <. 001) from WhiteNH after controlling for age group and sex.

^h Significantly differs (P < .001) from 65-74 age group after controlling for race/ethnicity and sex.

Significantly differs (P = .004) from WhiteNH after controlling for age group and sex.

Significantly differs (P = .002) from 65-74 age group after controlling for race/ethnicity and sex.

^k Significantly differs (P = .002) from WhiteNH after controlling for age group and sex.

Significantly differs (P = .003) from 65-74 age group after controlling for race/ethnicity and sex.

^m Significantly differs (P = .032) from WhiteNH after controlling for age group and sex.

ⁿ Significantly differs (P = .003) from WhiteNH after controlling for age group and sex.
